We contribute to  
shaping a more  
beautiful world.

# Company Profile

## About Us

**AMAR FOUND** is a certified construction company established in 1999, prominent in Maharashtra & Gujarat, India for geotechnical construction projects.

We are proud to be in engineering, gaining knowledge and experience in offering geotechnical solutions globally. With a focus on engineering excellence and innovation, we aim to offer clients a reliable experience. Clear communication and prioritizing client objectives drive our project execution for top-notch engineering solutions. We ensure top-notch delivery by assigning experienced and qualified professionals to serve our clients consistently.

## Our Vision

Our vision is to transform Amar Found into a leading company and build up sustainable design and construction for our clients.

## Our Mission

Our mission is to complete projects safely, economically, functionally, and creatively by managing design, policies, technical specifications, communication and staff development.
